**(check on-line for updated versions)**

- “[Introduction to Economic History](#)” is a compulsory first-year master course and can also be attended as an optional second-year master course. The objective is to present to a general introduction to economic history, with special emphasis on the interaction between capital accumulation, inequality regimes, and growth.

- Students wishing to specialize in economic history or related subjects are also strongly encouraged to attend the optional second-year master course "[Advanced Economic History](#)" (taught jointly by F. Alvaredo, J. Bourdieu, D. Cogneau, L. Kesztenbaum, E. Monnet, T. Piketty).
- Students with special interest in the history and theory of optimal taxation and redistribution or wishing to specialize in public economics are also encouraged to attend the optional second-year master course "[Public Economics](#)" (taught jointly by A. Bozio, J. Grenet, T. Piketty).

- The objective of the present course is to present an **introduction to economic history**, with special emphasis on the interaction between capital accumulation, inequality regimes and growth. Issues will include the following.
- **How did the world distribution of output, income and wealth - both between and within countries - evolve in the long run, and how can we account for these changes?** What was the interaction with the global ownership and power structure, colonization and the state formation process? How do inequality regimes, property regimes and political systems jointly evolve over time? What is the interaction between rising inequality, financial crisis, and the changing structure of political conflict?

- Question: **Can we properly understand economic issues with representative-agent formal economic models?**
  - Answer: **No.** We need to study history, society, and institutions: legal system, property regime, welfare state, progressive taxation, etc.
  - **And in order to analyze institutions and state formation, we need to study property, inequality & beliefs systems about the fair economy & the just society.** Ideas & ideology about economic and social justice matter for socioeconomic development. There can be no stability & no development without some minimal social consensus about the basic justification of social inequality.
- **economic history cannot be studied separately from social, political, cultural history & from moral and normative issues**
- mathematical models can be useful (and even indispensable), but only if they are used with parsimony (only when we really need them)
- economics/political economy/economic history belong to the social sciences, & should not try to escape from them

- In case you are interested to do research in economic history, public economics or related areas, you can have a look at this list of [master thesis](#) and [PhD dissertations](#) defended in recent years
- Also have a look at the list of members of the [Centre d'histoire économique et sociale François-Simiand](#) and their research topics
- And have a look at the [World Inequality Lab](#): WIL maintains the World Inequality Database ([WID.world](#)), an historical database on income, wealth and inequality that we will often use in this course.

On-going, collective project: you are most welcome to participate!

- The course is organized in 8 lectures of 3 hours each
- To validate the course, students are required :
  - (1) to attend and actively participate to all classes;
  - (2) to take the exam (the exam will require a good working knowledge of the material covered in the lectures and in the compulsory \* readings)(examples of past exams are [here](#))

# A quick roadmap of the lectures

- Lecture 1: Development, state formation & inequality in the long run: from ternary to proprietarian societies (Tuesday September 6 2022)
- Lecture 2: Property rights & development, 18c-19c: European variants (France, Britain, Sweden) (Tuesday September 13 2022)
- Lecture 3: Slave societies, abolitions & colonialism (Caribbean, US, Brasil, Africa) (Tuesday September 20 2022)
- Lecture 4: Colonial societies, state formation and comparative development (India, China, Japan) (Tuesday September 27 2022)

- **Lecture 5: The Great Transformation of the 20<sup>th</sup> century: from proprietary to social-democratic societies** (Tuesday Oct. 4 2022)
- **Lecture 6: Post-communist societies (Russia, China, Eastern Europe) and the rise of global capitalism** (Tuesday October 11 2022)
- **Lecture 7: Social inequality and party systems in historical perspective: Europe vs US** (Tuesday October 18 2022)
- **Lecture 8: Political cleavages in post-colonial societies: social-nativism vs social-federalism** (Tuesday October 25 2022)

# How to use the reading list

- The lecture slides contain many references to books (which themselves include more extensive bibliographies). Aim is to provide an introduction to the existing historical literature for students who plan to specialize in these areas. **You are not expected to read everything!**
- You should at least read the “**compulsory readings**” (denoted with a \*, **typically one-two readings per lecture**), as well as a selection of books and articles based on your own tastes. **But please read!**
- **The exam will be based upon a good working knowledge of all the material that is presented in the lectures and in the compulsory readings.** Please ask during the classes if there is anything unclear in this material.

# Reading list: general references

There is no formal textbook for this course, but I will largely follow:

- T. Piketty, \*[Capital et idéologie](#), Seuil 2019

- \*[Capital and ideology](#), Harvard UP 2020

See also [A Brief History of Equality](#), HUP 2022

I also recommend the following general references:

- F. Braudel, *Civilisation matérielle, économie et capitalisme, 15<sup>e</sup>-18<sup>e</sup> s.*, 1979 (3 vol.) (*Civilisation and capitalism, 15<sup>th</sup>-18<sup>th</sup> c.*, 1981-1984)
- K. Pomeranz, *The Great Divergence - China, Europe and the Making of the Modern World Economy*, Princeton UP 2000 ([Intro.-Chap.5-6](#))
- A. Maddison, [The World Economy - A Millennial Perspective](#), OECD 2001
- P. Lindert, *Growing Public - Social Spending and Economic Growth since the 18<sup>th</sup> Century*, Oxford UP 2004
- J. Goody, *The Theft of History*, Cambridge UP 2006

# Reading list: lecture by lecture

This reading list only includes the main references. **Compulsory readings are denoted with \***. More detailed references are provided in the lecture slides.

## Lecture 1: Development, state formation & inequality in the long run: from ternary to proprietarian societies
